**What is the
Central
Problem?**

Thinking about investing in
Stocks and Bonds??

Having trouble getting your foot
in the door? We can help!

What is Adelphi-SP?

Adelphi-SP is a website that clients can use to view stock prediction for various companies.

It is safe (Facial Authentication is featured!)

Data is constantly updated to provide the most accurate services.

How does it work?

- Front End:- Website was built using the Vue software.
- Vue mimics applications of React.JS with better user interface.
- Incorporates Microsoft Azure Face API to create a secure environment for users
- Flask Python

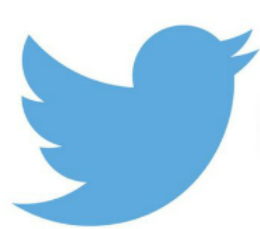

Flask

Microsoft Azure

How does it work?

- Backend:- Used Python as the main scripting language
- Alpha Vantage used to analyze and make prediction models for users
- Tweepy influenced predictions based on recent tweets and their sentiments about companies.

**KEEP
CALM
IT IS
DEMO
TIME**

Demo Time!!

**Thank you for
your attention!**
